

# Dilma Rousseff (2011-now)

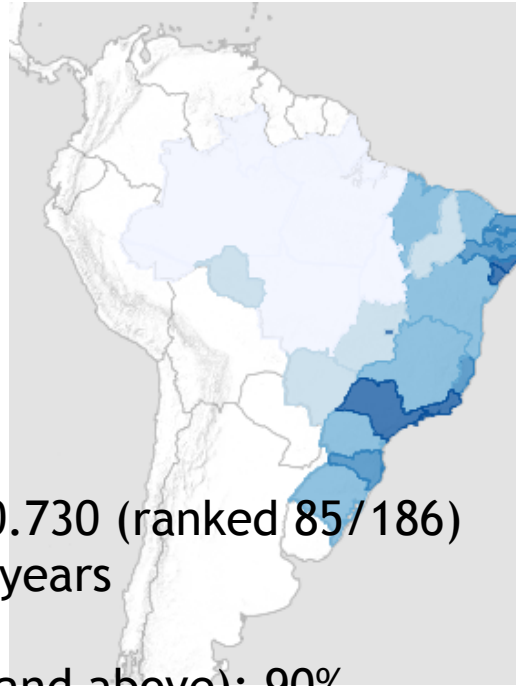

# Brazil Country Context

## FAST FACTS:

- Population (2012): 198.7 million
- GDP (2012): \$2.253 trillion
- GDP per capita (2012): \$11,340
- GDP growth (2012): 0.9%
- Inflation (2012): 5.4%
- Human Development Index (2012): 0.730 (ranked 85/186)
- Mean Years of Schooling (2010): 7.2 years
- Literacy Rates (2010):
  - Adult total (% of people ages 15 and above): 90%
  - Adult Male (% of males ages 15 and above): 91%
  - Adult Female (% of females ages 15 and above): 90%
- Life Expectancy at Birth (2011): 73 years
- Poverty Headcount at national poverty line (% of population):
  - 2013: 15,9%
  - 2009: 21.4%
  - 2008: 22.6%
  - 2007: 24.2%
- Access to Information Law: Passed in 2012
- Form of Government: Multiparty Federal Republic with two legislative houses

## Population Density Per square kilometer

2.017 ~ 6.144

6.144 ~ 20.03

20.03 ~ 59.62

59.62 ~ 94.26

94.26 ~ 441.7

# Inequality in Brazil

- Brazil experiences extreme regional differences, especially in social indicators such as health, infant mortality and nutrition. The richer South and Southeast regions enjoy much better indicators than the poorer North and Northeast.

- Poverty (people living with US\$2 per day) has fallen markedly, from 21% of the population in 2003 to 11% in 2009. Extreme poverty (people living with US\$1.25 per day) also dropped dramatically, from 10% in 2004 to 2.2% in 2009. **40 million Brazilians rose from poverty and entered the middle class over the past decade.**

  - Almost **TWO TIMES** the entire population of Yemen (about 24 million).

- Between 2001 and 2009, the income growth rate of the **poorest 10%** of the population was **7%** per year, while that of the **richest 10%** was **1.7%**.

  - Income growth of the poorest 10% **FOUR TIMES** greater than that of the richest 10%.

- Despite these achievements, inequality remains at relatively high levels for a middle income country.

# Participatory budgeting

- The first full participatory budgeting process was developed in the city of Porto Alegre, Brazil, starting in 1989
- Is a process of democratic deliberation and decision-making, and a type of participatory democracy, in which ordinary people decide how to allocate part of a public budget.
- Allows citizens to identify, discuss, and prioritize public spending projects, and gives them the power to make real decisions about how money is spent.

# Participatory budgeting

- Steps:
- 1) Community members identify spending priorities and select budget delegates
- 2) Budget delegates develop specific spending proposals, with help from experts
- 3) Community members vote on which proposals to fund
- 4) The city or institution implements the top proposals

# **Gabinete Digital**

## **Digital Democracy**

Created in 2011, the Digital Office seeks to provide answers to the crisis of representation that disturbs democratic regimes around the world

The Digital Office is one of the instances of the State System of Public Participation and Citizenship, which holds one of the largest budget consultations of the world.

In 2013, there were 1.2 million votes out of 8.1 million voters.

The portal was developed and licensed and open source tools can be freely replicated

We develop citizen participation and dialogue channels between society and the State Government

Governor launches a question and society responds. Proposals submitted and prioritized by population viewed online voting shares and public policy.
