About   Design It   Implement It   Further Support

Preparation - Launch - Selection - Implementation - Replicate & Scale - Capacity Building - Monitoring & Evaluation - Youth Voice

Preparation

PREPARATION OVERVIEW

The aim of this phase is to lay the foundation for a successful program implementation. It is worth taking the time to carry out these tasks well as they can be make-or-break factors for successful implementation. A solid team and strong partnerships can go a long way in making implementation smoother and ensuring more efficient use of resources.

During preparation, all of the ground work necessary for the successful delivery of the program is required to be planned, implemented and completed. Without a solid foundation, the program should not be launched.

The other 4 stages of the Fund delivery can be found in the menu above.

CHECKLIST

By the end of the phase you must have completed the 5 key tasks shown on the checklist.

- ✓ Hire the team
- ✓ Train the team
- ✓ Identify and engage partners
- ✓ Prepare the application pack

Cross cutting themes

- Capacity Building
- Monitoring & Evaluation
- Youth Voice

Project profile   ?

What are you trying to achieve?

- ✔ Build the capacity of organizations
- ✔ Test of innovative business ideas
- ✔ Expand and replicate innovative business ideas

Advice   Help

How much funding do you have?

$ [_____] Advice   Help

🗒 Jobs Calculator

This tool helps you estimate the number of jobs you can create with a total amount of grant funding or vice versa. Please note that the calculator is only based on the total grant funding and does not include other costs that are part of running the fund e.g. staff costs etc.

Enter a value into either field.

Grant (US$) [_____]

No. of Jobs [_____]

Disclaimer: This simple calculator offers a rough guide to the size of budget versus number of jobs created for an average Y2Y project. These figures are based on a typical project operated in West Africa. If you need more detailed figures and explanations of the project design, please use the "Design It functions"
