Team Contact German

- Projects
- Research
- Assessment & Software Development
- Cooperations

### Welcome to the TBA website

Within a very short time and in close collaboration with partners in Luxemburg, the TBA group has become a globally successful provider of innovative instruments for computer-based testing. In particular, the DIPF was able to succeed as the agent responsible for this area in both PISA 2009 and the OECD-study of adult competencies, PIAAC. This internationally successful work itself leads to national participations of the TBA group, for instance in the National Educational Panel Study (NEPS), in the area of technology (data warehouse) as well as the area of psychometrics and assessment (mode effect studies).

The international activities in the PISA framework of the OECD are successively extended. In the case of PISA 2003, the DIPF participated in conceptualising and assessing problem solving tests at an expert level. Since the 2009 assessment cycle, the DIPF is a member of the International PISA Consortium. In the 2012 assessment cycle, it will also be responsible for the "analytical" framework and important conceptualisations of the questionnaires within the consortium.

# Education and Human Development

**DIPF**

Bildungsforschung  
und Bildungsinformation

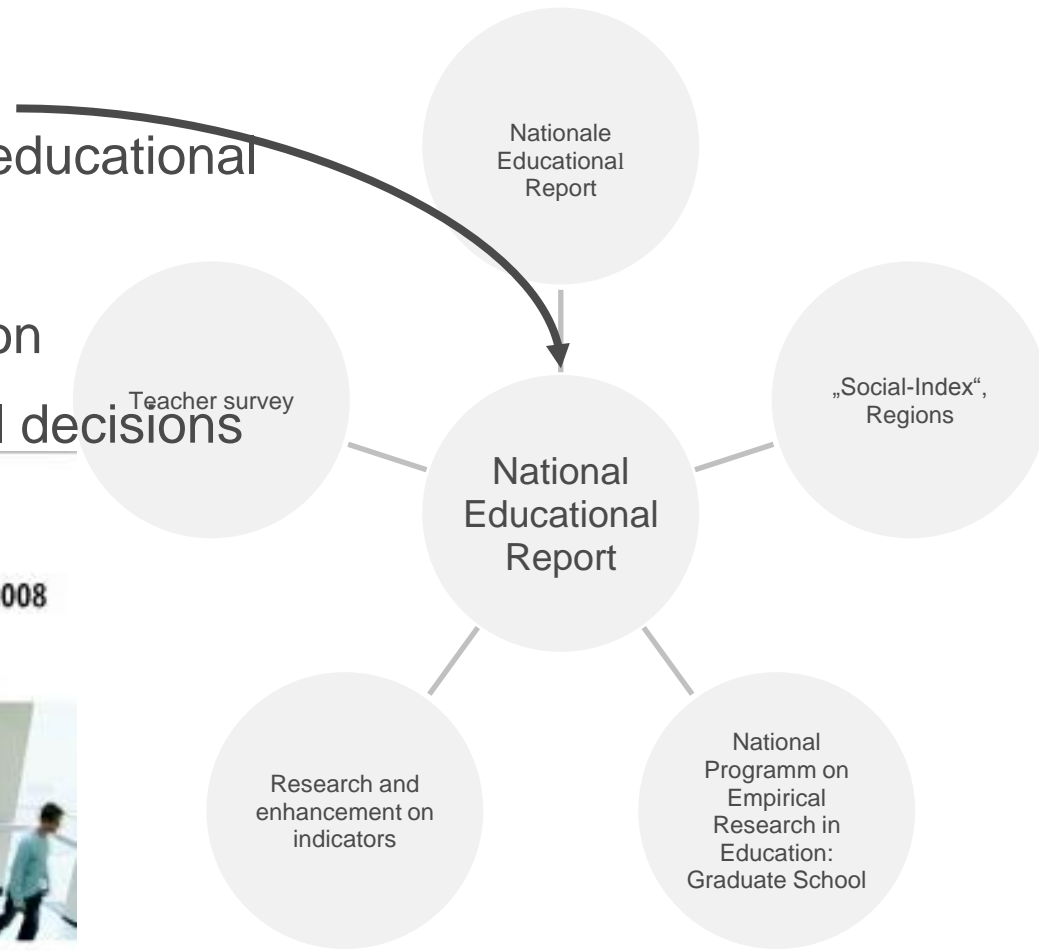

# Educational Quality & Evaluation

- conceptualising, measuring and evaluating educational quality
- empirically analysing conditions to education and
- evaluating measures in quality assurance and quality development
- How do schools change over time?
  - Surveys and large scale assessment (e.g. PISA, PIAAC)
  - School evaluation (TALIS, PEB, NEPS, DFG Priority Programme on Competence Diagnostics)
  - Intervention studies (Pythagoras, PERLE)

# Educational Governance

- Educational reporting / Indicator-based research
- Assessing the effectiveness of educational governance concepts
- Aspects of educational legislation
- Causes and effects of individual decisions in education

# Agenda

- DIPF
- Educational Information
  - Library for Research on Educational History
  - Information Center for Education
- Educational Research
  - Center for Research on Education and Human Development
  - Center for Research on Educational Quality and Evaluation
  - Center for Research on Educational Governance
- Technology Based Assessment
- International Cooperation in Education

# Technology Based Assessment

- Supporting national and international educational projects with technology based test methods.
- Investigating technology based assessment for improving the validity of tests and enhancing measurement efficiency.
- Designing procedures and standards for optimising technology based test development processes.
- Supporting large-scale studies in national and international co-operations, e.g. the OECD study Programme for the International Assessment of Adult Competencies (PIAAC), The National Educational Panel Study (NEPS) and the Programme for International Student Assessment (PISA).
