

# INDICADORES DE DESEMPEÑO DEL SECTOR TRANSPORTE

Perú, Tarapoto, 12 al 16 de marzo del 2006

## A G E N D A

### OBJECTIVES OF THE WORKSHOP

- Create awareness about new trends in transport sector data management and the processes of monitoring the sector's performance with respect to national and international development targets;
- Identify the critical aspects of the need for reliable data in the transport sector;
- Analyse the transport sector data presently available in relation to local, national and regional priorities and identify shortfalls;
- Assess current strengths
- Identify future requirements for statistical information and key gaps.

### Outputs from the workshop:

- Capture key sectoral priorities in various countries
- Capture thematic priorities [e.g., environment, poverty, growth, safety, gender etc]
- Collate/list key indicators and measures in use
- Identify gaps in the indicators used.
- Organisational aspects including how data is managed, and how accessible it is for cross-sectoral planning.

Perú, Tarapoto, 12 al 16 de marzo del 2006

## DAY 4

### FIELD TRIP

Four groups go to different places.

- Instituto Vial Provincial, San Martín (rural and urban transport) San Antonio-Cumbaza
- Inter Ocean Corridor and Inter modal Transport (trade logistics) Juan Guerra-Puerto López-El Sauce
- Regional Government: Cuñumbuque-Zapatero
- Municipality of Tarapoto (urban transport planning)

Group work around these and other questions from the group arising from the field trip:

- What are their sources of data?
- How do they collect data for the type of work they do (methods and procedures)?
- What transport indicators are they using?
- What are they being used for? (planning, monitoring, etc.)
- Are they being used effectively? Are they useful? Are they being monitored?
- What challenges do they face for managing data?
- Any suggestions you would have to what you have observed and discussed during the field trip?
