

Street-Addressing Presentation

Street-Addressing in African Cities

by Groupe Huit
with World Bank and
French Ministry of Foreign Affairs

Applying to Urban Management and Economic Development

URBAN MANAGEMENT

(1) Infrastructure, Urban Services and Facilities Maintenance

- Urban Roads and Drainage (*Cityvia*)
- Urban Investment Planning and Programming (*IPIE*)

(2) Street Addressing and local tax system

- Urban and land use taxation : Residence Tax, Urban Tax
- Samples in Burkina-Faso, Togo and Mali

(3) Street Addressing and Public Urban Utilities

- Concessionnaires Water supply, Electricity, Communication) -
Refuse removal

(4) Social and Sanitary Action

- Programming and backing to Social and Sanitary Action
Ex. Maputo : Cholera epidemia follow- up

(5) Street Addressing and Urban and Municipal Development Projects

Applying to Urban Management and Economic Development (follow)

- **The Addressing Data Base coupled with the detailed Map of the City allows private economic actors to develop their own activities.**
- **It enable them to know location of their consumers and of their competitors.**
- The addressing unit has to implement a marketing plan to present its own services, to identify its clients (public and private ones).
- It is necessary to prepare and define what kind of services may be opened to private sector particularly for their own marketing survey.
- A price grid is to be established: Maps and index; Thematic Maps, Files Extracts (confidential information is to be defined), specific works on request.

STREET ADDRESSING COST BY CITY

unit : 1000 Fcfa

Country -City	Population	By Inhabitant	TOTAL	Donor	City
---------------	------------	---------------	-------	-------	------
