

EU 2030 Strategy

Challenges and Opportunities

Dacian Cioloș

4 of June 2015 - Sofia

EU 2030 Strategy on Climate & Energy : Ambitious targets

- Reduction GHG emission by 40% below 1990 level, effort for ETS and non-ETS sectors, including Agriculture
- Renewable energy at 27% but biofuels into question

Research and Innovation should contribute to find solutions : EIP

- 
- To adapt and develop new agricultural practices :
soil, water, biodiversity, GHG emissions,
renewable energy
 - To develop Risk Management instruments

Overally to change the perception about Natural
Ressources and their utilisation
