CICED.....

Center for International Cooperation in Education Development (CICED)

CICED was established on July 14th, 2008 by decree of the Russian Federation.

CICED's aim is the coordination and execution of work on initiatives designed to help international development in education, particularly through aid to developing countries.

CICED actively participates in the READ program implementation with our partners:

Working with READ Program **CICED** focuses on development of Russian expert capacity

CICED performs activities in the following areas:

- development, support and practical implementation of projects to assess the quality of education, including education assessment tools
- organization of seminars, conferences and training in educational management and quality assessment
- provision of research grants and scholarship program
- establishing a communication platform of experts and a network of experts in the field of international development aid in education
- promotion of Russian development, consulting expertise and education abroad

CICED supports development of Russian expert capacity

CICED promotes the SAM tool

SAM (School Achievements Monitoring) – test tool to assess students' subject competencies. SAM model is laid by theory of L.Vygotskiy. At this stage SAM tests for primary school graduates are developed for Mathematics and Russian language.

Functional level

procedural knowledge - knowledge of specific algorithms and standard procedures that have been directly taught

Reflexive level

conceptual understanding - understanding how to solve a whole range of problems related to the same concept

Formal level

functional competence - conceptual flexibility that allows to see a full range of possible solutions and identify the best

Zone of Proximal Development

Future of SAM development – grant application to GPE from Russia

Global Partnership for Education (GPE, former FTI) is a global multilateral trust fund for educational development aid (over 3 billion dollars)

GPE Board of directors approved CISED's application for the GRA grant to conduct the research on the influence of teaching practices and methods on the development of students' reasoning skills

Possible of country partners - Armenia, Kyrgyzstan, Moldova, Mongolia, Tajikistan, Uzbekistan

The project will be implemented with use of the SAM tool

Our partners in 2008-2014:

National and regional assessment centers:

International institutions:
