

“Assessing Targeting and Poverty Performance”

ADePT SP

December 5th, 2013

Session Overview

Session objective: understand targeting data to inform program design & measure performance

- Moving from targeting concepts to data-based analysis (and poverty impact time permitting)
- Group exercise with example dataset
- Discussion and interpretation of results

What is targeting?

- Concentrating safety net transfers to population sub-groups
- May include single criteria for 'target', such as
 - Poor and/or extreme poor
 - Largest poverty gap
 - Geographic region
 - Households with family
 - Other vulnerable groups: eg elderly, households with children, ethnic group
- More common to have multiple/ layered criteria, eg: in poorest geographic area, and then criteria for poorest in these areas (eg PNSP)

Types of targeting

- Categorical
 - Age – pensions for elderly (note that universal child or elderly transfers still use targeting)
 - Other demographic: family structure, ethnicity
- Means-based – means or PMT
- Community-based
- Self-targeting
- Combination

How to measure targeting performance

- Depends on program objectives and criteria
- **Distribution of benefits**
 - *Amount received by intended group/ program total transfer amount*
- **Distribution of beneficiaries**
 - *Number of intended beneficiaries receiving transfer/ program total number of beneficiaries*
- Anti-poverty program – often looks at proportion of benefits accruing to the bottom quintiles (progressivity vs regressivity)

The distribution of targeting methods, by region and country income levels

	Individual assessment			Categorical				Self-selection		
	Means tests	Proxy means tests	Community assessment	Geography	Age-elderly	Age-children	Other	Work	Consumption	Community bidding
By region										
Latin America and the Caribbean, 65	6	4	3	19	4	13	6	4	0	6
Eastern Europe and FSU, 41	12	1	3	1	6	10	7	0	0	1
Middle East and North Africa, 17	3	0	0	1	0	0	0	0	12	1
Sub-Saharan Africa, 21	3	0	2	3	4	1	1	2	4	1
South Asia, 45	2	1	3	16	2	1	6	4	10	0
East Asia, 37	3	1	3	8	4	7	8	1	0	1
By income level										
Poorest, 129	10	3	10	34	8	12	21	7	18	6
Less poor, 97	19	4	4	14	12	20	8	4	8	4
By program type										
Cash transfer, 87	19	4	5	8	15	21	15	0	0	0
Near-cash transfer, 36	4	3	0	12	1	2	4	0	10	0
Food transfer, 30	0	0	5r	9	3	8	4	0	0	1
Food subsidy, 21	3	0	0	1	0	0	0	0	16	1
Nonfood subsidy, 8	3	0	0	1	1	1	2	0	0	0
Public works, job creation, 26	0	0	2	9	0	0	4	11	0	0
Public works, program output (e.g., social fund), 18	0	0	2	8	0	0	0	0	0	8
Total, 226	29	7	14	48	20	32	29	11	26	10

Notes. 1. Many programs use more than one targeting method. Thus the total number of targets methods tallied is greater than the number of programs.
 2. Poorest countries have per capita GDP in PPP dollars below 1,200; less poor countries have per capita GDP above 1,200 and below 10,840.

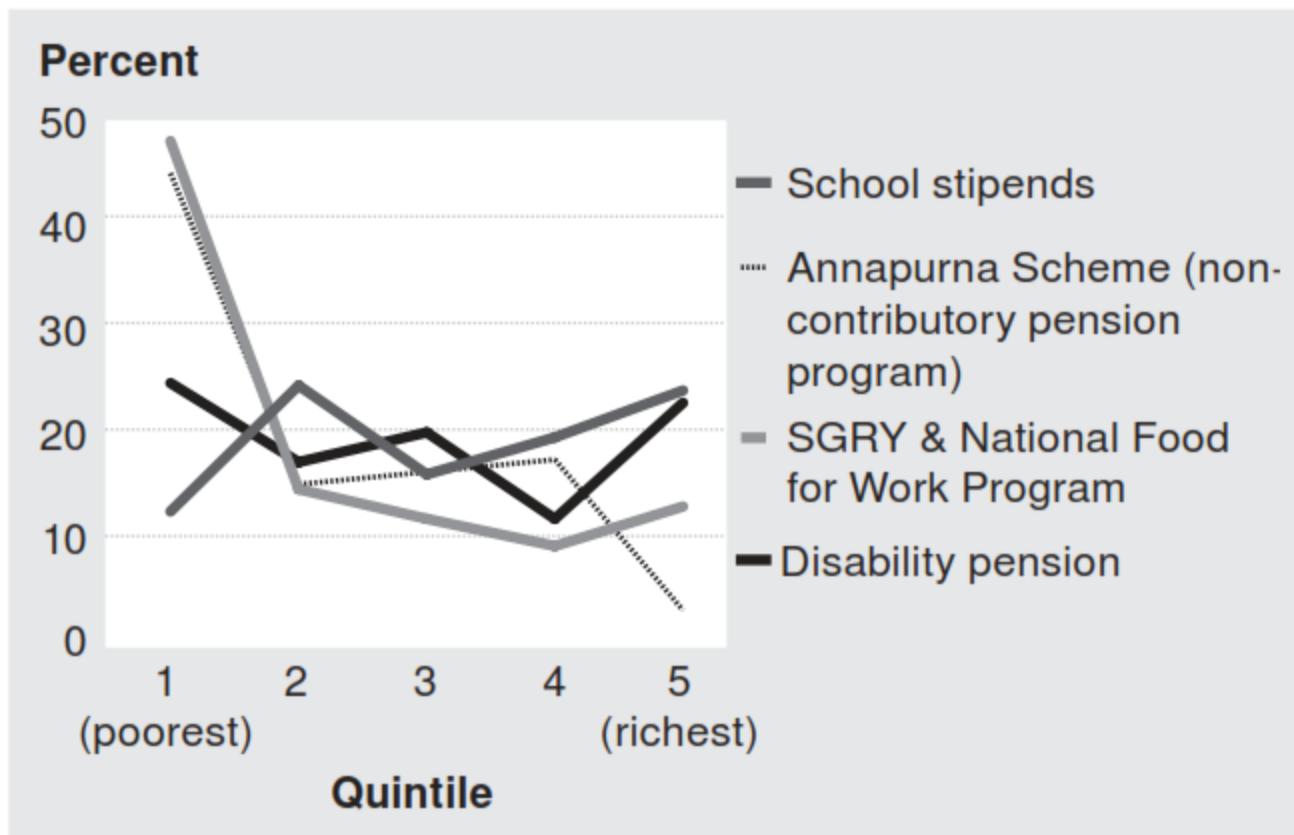

Median targeting performance, by targeting method

<u>Targeting method</u>	<u>Sample size</u>	<u>targeting performance</u>	
All methods	77	1.25	←
Any form of individual assessment	30	1.40	
Means testing	20	1.35	
Proxy means testing	6	1.44	
Community assessment	6	1.40	
Any categorical method	53	1.32	
Geographic	31	1.33	
Age – elderly	10	1.08	
Age – young	22	1.45	
Other categorical	18	1.40	
Any selection method	36	1.10	
Work	4	1.85	
Consumption	25	1.00	
Community bidding	7	1.10	

Target group receive 25% more than non-target group

Share of Benefits Accruing to Each Quintile for Selected Safety Net Programs, India, 2004/05

0.0

SOURCE: Coady, Grosh, and Hoddinott 2004, table 3.4.

NOTE: The Coady-Grosh-Hoddinott index reports the share of benefits accruing to the group observed divided by the share of the group observed in the total population—for example, the share of benefits going to the poorest 40 percent of the population divided by 40. For most observations, it reflects the distribution of benefits to the poorest two quintiles, or to the poorest quintile or fraction of the poor.

ePT

Group Exercise- Bulgaria

Topics for analysis

- 1) Which part of social protection transfers is best targeted to the poor?
 - Social insurance?
 - Labor market?
 - Social assistance?
 - Remittances?
- 2) Which programs are best and worst targeted?
- 3) Which programs have the largest poverty impact (time permitting)?

Table 6_3 : Distribution of Beneficiaries

	Total	Q1	Q2	Q3	Q4	Q5

Poverty Impact

Conceptual framework for SP poverty impact

- Poverty impact is a function of:
 - Targeting beneficiaries
 - # intended beneficiaries / total beneficiaries
 - Eg individuals below poverty line
 - Adequacy/ generosity of transfers
 - Size of transfer/ individual income
 - Well targeted (covering all poor) transfers that have sufficient adequacy → maximizes poverty impact

Impact of programs on Poverty - simulating absence of program (Bulgaria)

Concluding remarks

- Targeting allocates fixed resources to intended group
- Important to look at incidence of benefits & beneficiaries for per
- Targeting can allow for increasing benefit size compared to universal programs
- Combination of targeted and larger transfers can increase the poverty impact

Thank you!

- If your country or organization is interested in a training on Social Protection, Poverty and other topics (1/2 day to 3 day courses):
 - Please contact Mr. Ruslan Yemtsov ryemstov@worldbank.org, Ms. Claudia Rodriguez crodriguezalas@worldbank.org, or Mr. Brooks Evans bevans2@worldbank.org
