

Day One Agenda
Strong Growth, Resilient Economy National Conference
Leadership Dialogue
Hyatt Kilimanjaro (Marquee)

Objective

Building on the energy toward global action on climate change by all segments of society coming from the New York Climate Summit, and moving into global climate negotiations in Lima in December 2014, Paris in December 2015 and beyond, this event will bring together key decision makers, leaders, and innovators to:

- Deliberate what climate resilient economic growth can and should look like in the Tanzanian context
- Hear from business, academic, international organisations, donor community and government leaders who are at the forefront of taking action, harnessing opportunities, creating jobs, and reducing poverty while addressing future climate risks
- Discuss what is needed to position Tanzania’s policies, plans, and investments toward an inclusive, resilient growth trajectory

This leadership dialogue will form the basis for a second day of technical discussions among stakeholders on how Tanzania is currently implementing action on climate change, and how key challenges can be overcome and opportunities of resilient growth scaled up.
