Grant Guidelines
SVRI and the World Bank Group’s
Development Marketplace for innovation on GBV prevention
(in Memory of Hannah Graham)

General Introduction
Gender-based violence (GBV) is one of the greatest social, economic and development challenges facing the world today. At least one-third of women across the globe experience GBV and the health and development consequences that this violence brings. The costs of violence are substantial. Violence against women and girls impedes full participation in society, limits access to education, labor force participation and ownership of assets, to name a few. For intimate partner violence alone, selected country estimates suggest that out-of-pocket expenditures, lost income and reduced productivity can amount to up to 4% of GDP—more than what many governments spend on primary education. (Klugman et al. 2014) GBV prevention is a growing field, with an increasing body of interventions based on research and evidence contributing to the field’s knowledge about what works to stem the cycle of violence. Capitalizing on this momentum to achieve broader and more sustainable change requires tapping the creative energy of emerging leaders and solution-makers in the public, private, and non-profit sectors. It also requires documenting our successes and failures to ensure that we continue to advance the field by investing limited resources towards the most effective strategies. To contribute to this global effort, the SVRI in partnership with the World Bank Group have created the SVRI and the World Bank Group’s Development Marketplace on Innovations to prevent GBV in Low and Middle income settings (in memory of Hannah Graham)¹

The SVRI and the World Bank Group are requesting proposals for research and interventions or related activities that will contribute to the prevention of gender-based violence in low and middle income countries.

Due to high levels of competition and limited funds available, the quality of the proposal submitted will determine success in your funding application. Applications from legally constituted institutions, or organizations that have existing capacity, with high quality proposals are most likely to be successful in this category.

¹ Find a list of all current low-middle income economies on: http://data.worldbank.org/about/country-and-lending-groups#Lower_middle_income; for information about how the World Bank classifies countries please see: https://datahelpdesk.worldbank.org/knowledgebase/articles/378834-how-does-the-world-bank-classify-countries
Eligibility of Applications
Applications for support under this grant should be affiliated with a recognized, legally constituted research institution or non-government organization with existing research or programming capacity.

A maximum of two proposals will be considered for funding per applicant. Only one grant through this mechanism may be held by an applicant until the project has been completed. Grant applications that are made in partnership between non-government or research institutions and a private sector entity are not excluded, but the grant can only fund the research or non-government institution itself. Private sector companies are encouraged to contribute to the research and/or intervention through their own resources. Grants that are proposing work on behalf of UN Agencies will not be considered.

Nature of Supported Projects
All projects under this call should focus on the prevention of GBV in low and middle income countries.

Types of projects that may be supported through this call for proposals include:

- Piloting, adaptation, testing and/or scale up of new or promising interventions, including formative research that will contribute to the design of GBV prevention interventions, and projects on the creative uses of Information and Communications Technology (ICT) and social media campaigns to challenge social norms that promote and accept the use of violence.
- Self-contained research projects that are either stand alone or fit within a larger project which will build on, or support primary prevention of GBV, including formative research studies, pilot or feasibility studies.
- Costing studies on promising/effective GBV interventions to assess value for money.
- Adding a new component/arm to an already funded intervention that can provide additional insight into the effectiveness of intervention components.
- Projects to disseminate promising research findings including those with creative uses of ICT to advance the effective translation of research findings into policy and practice (increase research uptake and bridge the gap between researchers and program officers).
- Secondary analysis of existing data
- Studies to better understand the mechanisms and pathways of change of effective GBV prevention interventions

If the funds are sought for scale up or dissemination activities, the application must provide sufficient information to enable the scientific quality of the original study to be assessed as well as a description of the activities for which funds are requested.

Project Length and Duration
The activities supported under this grant should be for a maximum of 12 months duration, with the expectation that the grant will cover all, or the majority of, the costs of the activities specified. The common characteristic of these grants is the provision of limited funding for a short period of time with a clear measurable outcome. Grants to a maximum of USD150,000 may be awarded. Any applications with requests exceeding this amount will not be considered.
Guiding Principles for SVRI and World Bank Group’s Development Marketplace for innovation on GBV prevention supported projects

Projects supported by the SVRI and the World Bank Group should:

- Adhere to international safety and ethical guidelines
- Focus on low and middle income-settings
- Be conceptualized within a human rights framework
- Strive to be cross-sectoral and multi-disciplinary;
- Where relevant and appropriate endeavour to engage the community that is being researched;
- Challenge the gender hierarchy that contributes to sexual violence in order to promote gender equality.
- Inform policy, programs and services and serve to strengthen access to comprehensive care and support for survivors

Types of Violence
The focus of this grant is on building evidence for the primary prevention of GBV as a mechanism for preventing future perpetration and victimisation. Gender-based violence can include but is not limited to, intimate partner violence, sex trafficking, sexual harassment, harmful traditional practices such as early and forced marriage, so called “honor” killings, and female genital mutilation/cutting.

Understanding Primary Prevention
The following graphic provides an overview of the different levels of prevention.

![Primary Prevention Diagram](http://www.who.int/violence_injury_prevention/capacitybuilding/courses/intimate_partner_violence/en/)

Using this framework, primary prevention interventions aim to address underlying causal factors or drivers of GBV, such as gender inequality, problematic social constructions of gender, and a prevailing “culture of violence” (or the normative use of interpersonal violence), in an effort to prevent the violence before it starts. For more information on SVRI’s work on primary prevention visit: [http://www.svri.org/primaryprevention.htm](http://www.svri.org/primaryprevention.htm).
Eligible Countries and Organisations

- **Low and Middle Income Countries:** All organisations based in low and middle income countries (as classified by the World Bank), and organisations not based in low and middle income countries but working in such countries are eligible to apply.

- **Track Record:** Priority will be given to organisations with a track record of research and intervention development for the prevention of gender-based violence in low and middle income countries.

- **Institutions Only:** Awards will only be made to institutions and not to individuals. All non-profit organisations are eligible to apply, including academic, research, NGOs.

- **Number of Proposals:** An organisation may submit a maximum of two applications but no organisation will receive more than one grant.

- **Partnerships:** Partnerships between multiple organisations are encouraged, for example, a local NGO and an academic institution or a private sector entity. We encourage partnerships between academic and research institutions and implementing organizations. The partnership between these two types of organization should have as an objective building the research capacity of the implementing agency.

Application Process, Review and Assessment of Proposals

**Application process:** The SVRI and the World Bank Group will issue a Request for Proposals (RFP) inviting colleagues to apply for funding. Applicants should submit an application after they have considered the above requirements and assessed whether their proposal is suitable for support under this call.

All applications must be submitted via the South African Medical Research Council (SAMRC) Grants online system, and reach us by midnight (South African time) on the 9th December 2015.

Only applications submitted via the online system before the given closing date and time will be considered.

Please try and submit well before the deadline. The SVRI, World Bank Group, SAMRC and Proposal Central cannot be held responsible for delays and problems with internet connectivity.

**Registering your institution:**
If you are a first time user of proposalCENTRAL you must first register, before you can proceed with your application. To do so you must:

- Go to [https://proposalcentral.altum.com](https://proposalcentral.altum.com)
- Select “First Time Users – Register”
- Complete the registration page.
- Create your own Username, password and challenge question for your user account.
- Click “SAVE” when done.
The registration confirmation screen will confirm your new account has been created. For security purposes, you will receive a confirmation number by e-mail which you must enter when you log in the first time.

Contact Proposal Central at pcsupport@altum.com if you experience any difficulties with this process.

Filling in the online form:

- **Graphics and tables**: The online application form cannot accept graphics and tables. Any graphics and tables must be uploaded as attachments.
- **CVs of Key Personnel**: Please provide CVs of all personnel who will be working on this project using the CV template provided.
- **Project Plan**: A project plan must accompany the application. Again, please use the template provided.
- **Budget**: Applicants should provide a 12 month budget in USD using the online application form. The budget should be a definitive line-item budget for all direct costs, and administrative or indirect costs, and must exclude capital expenditure; general operating support; U.S.-based activities; and any lobbying activities. Overhead should be no more than 15% of total costs and the total cost of the proposal should not exceed $USD150,000 including overhead. **Proposals requesting more than the stipulated maximum will be rejected at point of receipt.**

The extent of individual cost items should match the scope of the project, reflect real or estimated cost burdens, and not be padded.

Please use the following guidelines to calculate personnel costs:

- **Personnel (employee)**: calculate the employee daily rate using the person’s annual salary inclusive of fringe benefits (e.g. pension, medical aid etc.) divided by 260.
- **Personnel (consultant)**: the daily cost of the consultant to your institution.

The budget must be accompanied by a budget narrative. More details on how to fill in the budget and budget narrative are provided on the online form.

- **Capacity statement**: This statement provides the SVRI and World Bank Group with details on the extent to which applicants have the relevant expertise / experience to manage / complete the project successfully.

- **Saving your work**: Please remember to save your work before moving on to the next page. Also note that you cannot edit in print format. Any changes made whilst you are in print view will not be saved.

- **Submitting your proposal**: Please note, your proposal has not been submitted if you do not receive a confirmation email from proposal central confirming you have submitted your proposal. Please check with proposal Central if you are uncertain if your proposal has been submitted.

- **Assistance with your online application**: Your questions and concerns can be directed to proposal Central Customer Service by email to pcsupport@altum.com. Follow-up questions can be directed to proposal Central’s customer service line 800 875 2562 (Toll-free U.S. and Canada) or +1 703 964 5840 (Direct Dial International).

**Review process**: Once the proposal has been received by the SVRI and the World Bank Group it will be processed by the SVRI and World Bank Group colleagues, and peer reviewed by an expert review committee. The results of the review process will be sent within 4 months of application.
**Peer review criteria and scoring of proposals:** Peer reviewers are asked to review a proposal according to a set criteria as well as specific questions under each criterion. In submitting a proposal for funding, applicants should make every effort to ensure that the proposal address these aspects. The criteria and questions are outlined below.

<table>
<thead>
<tr>
<th>Criterion</th>
<th>What reviewer has to comment on</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Overall merit</strong></td>
<td>Will the project build the evidence for primary prevention gender-based violence in low and middle income countries? If it is an intervention, is the intervention likely to succeed with respect to the qualifications of the project team, the institution within which the project is housed?</td>
</tr>
<tr>
<td><strong>Research / project design and methods</strong></td>
<td>Is the design / method sound, feasible and relevant to the questions being asked? Is the approach proposed appropriate and likely to accomplish the project goal and outcomes? Are potential problems recognised and addressed with alternative approaches? Does the project include a thorough proposal for capturing lessons learned during design and implementation?</td>
</tr>
<tr>
<td><strong>Significance of the proposed project</strong></td>
<td>Will the project build capacity, technical skill and knowledge in the field of primary prevention of GBV? Will the project advance basic theoretical concepts, improve or enhance policy and practice in the field of GBV primary prevention? Does the application build on current knowledge in the field? Does it challenge and seek to shift current research or approaches to policy and practice by utilising sound theoretical concepts, approaches, methodologies, tools or interventions? If relevant to the project - does the project provide a clear theory of change? Will the project contribute to solving barriers to progress in the field? Is the project replicable?</td>
</tr>
<tr>
<td><strong>Project manager / team</strong></td>
<td>Is the training and experience of the project manager and team appropriate for the project or activity? Is there sufficient expertise and level of accomplishments within the team / institution to generate confidence in success?</td>
</tr>
<tr>
<td><strong>Ethical considerations</strong></td>
<td>Will human subjects be utilised in the project? If so, will they be appropriately protected from potential research risk? Will the project be conducted in a professional manner, in accordance with the applicable industry standards, and ethical guidelines, including but not limited to: Putting Women First: Ethical and Safety Recommendations for Research on Domestic Violence Against Women, Department of Gender and Women's Health Family and Community Health. World Health Organization. 1999; Researching Violence against Women: A Practical Guide for Researchers and Activists. World Health Organization and Program for Appropriate Technology in Health (PATH) 2005; Ethical and Safety Recommendations for Research on Perpetration of Sexual Violence. Jewkes R, Dartnall E and Sikweyiya Y. SVRI and Medical Research Council South Africa, 2012.</td>
</tr>
</tbody>
</table>
Upon consideration of the above criteria and specific questions, peer reviewers will score the quality of the proposal and make recommendations on fundability.

**Overall Timeline for Processing Proposals for Funding**

<table>
<thead>
<tr>
<th>Steps or actions</th>
<th>Timeline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Call / request for proposals</td>
<td>October 2015</td>
</tr>
<tr>
<td>Closing date for applications</td>
<td>9th December 2015</td>
</tr>
<tr>
<td>Peer review process</td>
<td>Jan – April 2016</td>
</tr>
<tr>
<td>Acceptance of grants by grantees</td>
<td>April-May 2016</td>
</tr>
</tbody>
</table>

**Application Checklist (incomplete applications will not be considered)**

- Completed online application (including project outcomes and budget)
- Completed and signed SVRI and WBG DM Grant Approval Form
- CVs of key personnel using the template provided
- Project Plan using template provided
- Capacity statement
- References
- Appendices (if required)

**Grant Information Summary**

- **Level of award:** to a maximum of $150,000
- **Period of award:** grants are tenable for up to 12 months.
- **Closing date for applications:** 9th December 2015
- **Further information:** email svri@mrc.ac.za or vawg@worldbank.org
- **Method of application:** Applications must be submitted online using the SAMRCs electronic grant application system.
