Quality Assurance as a Control Panel

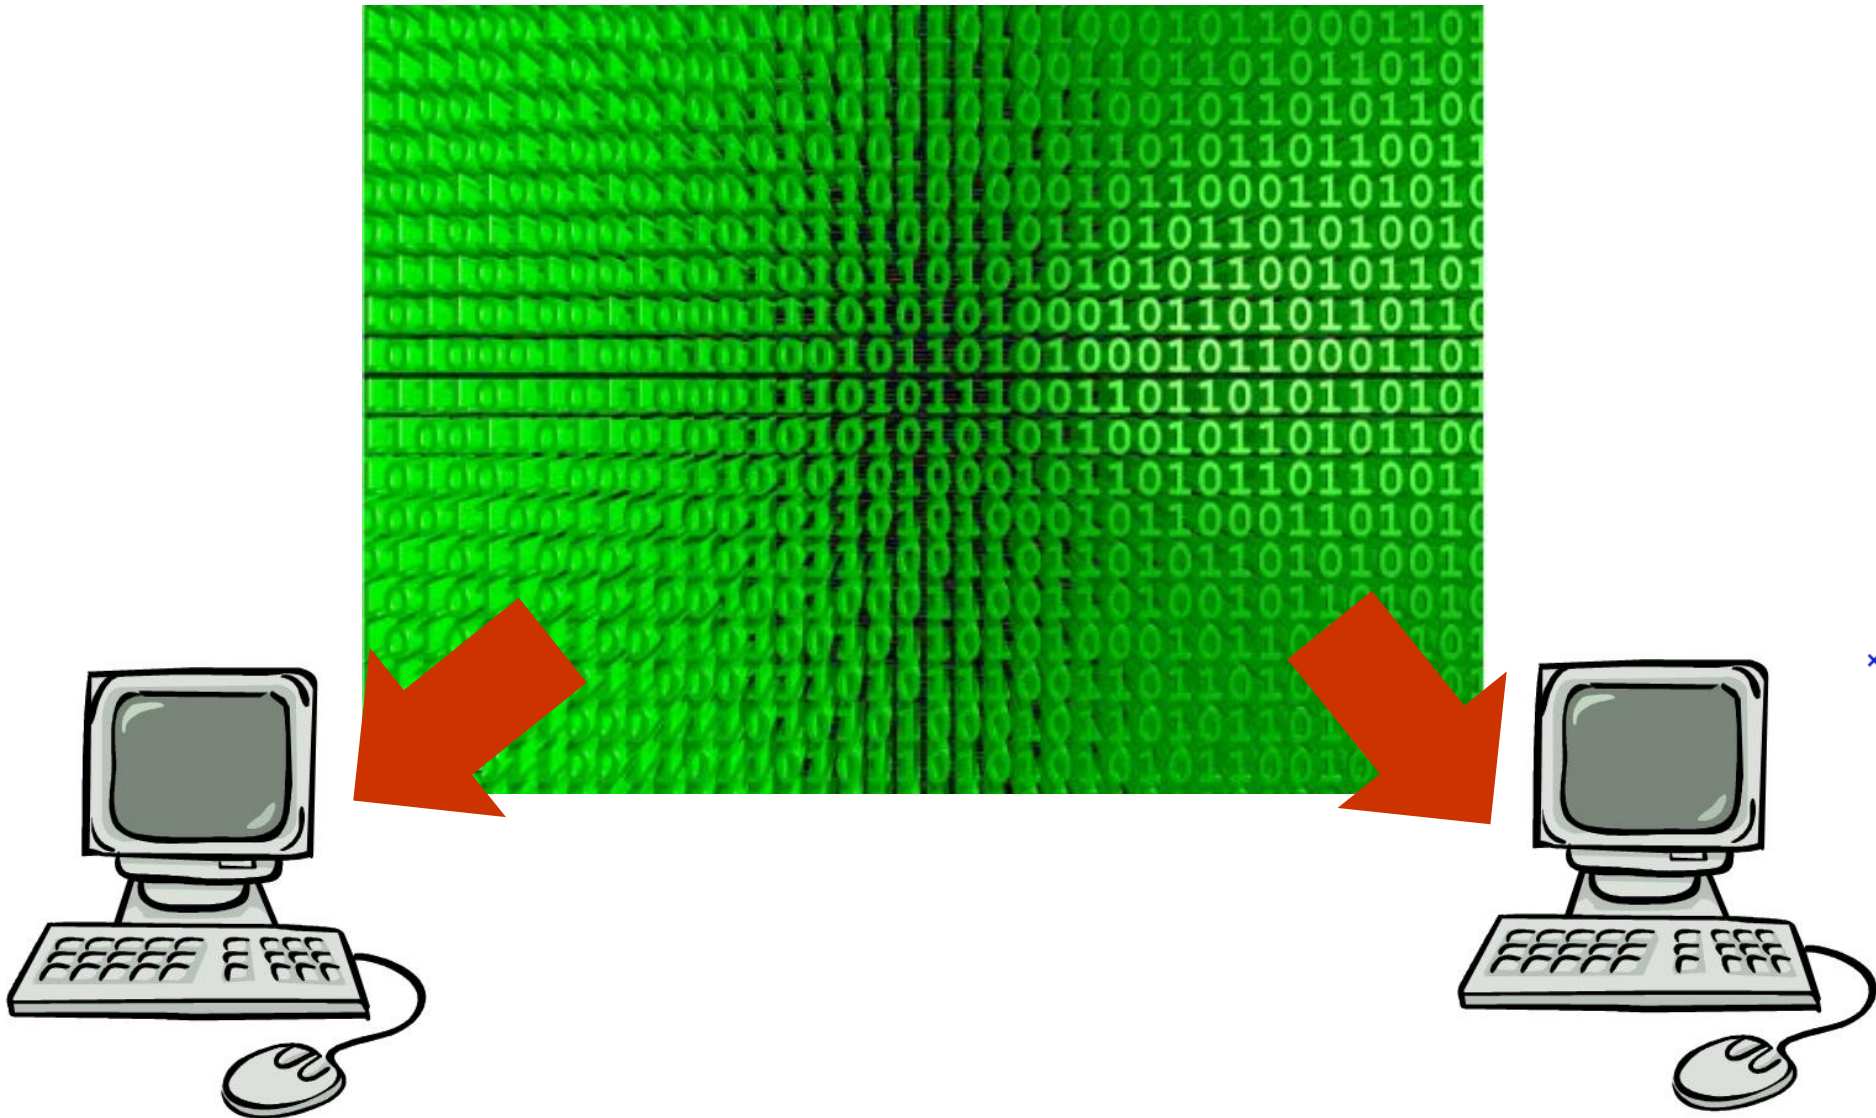

Restrict access to examinations

Monitoring the internet

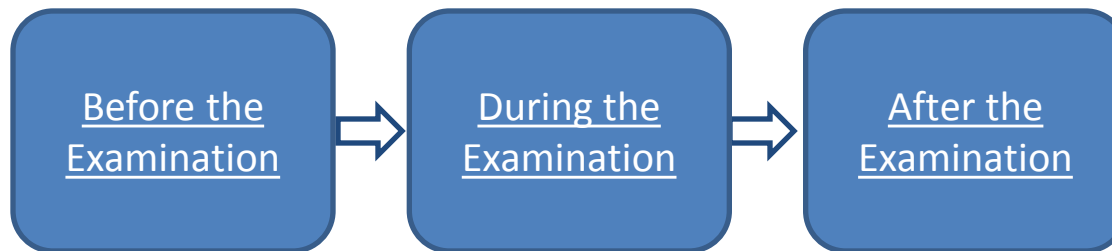

Double data processing

Activity 1:

Quality Assurance Mechanisms

- At your table, identify and discuss mechanisms that can ensure the quality of an examination program
- Are these mechanisms relevant for your country?
- Select one team member to share the outcomes of your discussion with the room

Issues to consider

Issues to consider

- What mechanisms for ensuring the quality of the examination program are currently in place in your country?
- What mechanisms still need to be introduced?
- What resources are needed to implement new and sustain existing mechanisms?

You are welcome to take a 15
minute break.
