State Subsidy Program for Local Community Initiatives for 2024-2027

PROGRAM GOAL:

To create conditions for the implementation of projects proposed within the framework of local community initiatives and to provide assistance to all involved participants in implementing such projects

PROGRAM PRIORITY AREAS:

- 1** Establishing a mechanism for subsidizing local community initiatives, and subsidizing local community initiatives through Funds
- 2** Capacity building for participants for the development and implementation of local community initiatives
- 3** Ensuring the sustainable implementation of local community initiatives

EXPECTED RESULTS:

- Increasing the awareness of local communities regarding the promotion and implementation of local community initiatives;
- Enhancing the capacity of all participants in local community initiatives, including local community initiative groups;
- Creating conditions for the implementation of local community initiatives.

Program for the Establishment and Development of Growth Support Centers for 2025-2030

PROGRAM GOAL:

To ensure the creation of favorable conditions within Growth Support Centers for attracting economic and social investments that contribute to the development of adjacent territories at the regional level or the entire region.

PRIORITY AREAS:

- 1. Development of master plans** and achievement of regional development standards;
- 2. Attracting investors** and developing the processing industry;
- 3. Improving the infrastructure** of the growth support center;
- 4. Creating an economically sustainable system for providing essential services to the population;**
- 5. Attracting leading educational institutions to the growth support centers;**
- 6. Creating conditions to attract (or engage) citizens to (or in) the cultural sphere**

Growth Support Centers are:

- **Regional centers (or Oblast centers);**
- **The pilot cities of Uzgen (Uzgen district) and Kant (Ysyk-Ata district);**
- **Cities that have developed master plans.**

State Program for the Comprehensive Socio-Economic Development of the Regions of the Kyrgyz Republic for 2025–2030

The goal of the State Program is to ensure the effective management of the regional development of the Kyrgyz Republic, which contributes to sustainable economic growth and increasing the social well-being of the population.

State Program Objectives:

- Developing urbanized areas as drivers of growth;
- Developing areas requiring special attention;
- Introducing mechanisms for spatial management and development;
- Improving the regional development management system.

Comprehensive socio-economic planning:

Comprehensive socio-economic development of regions involves the interconnection of sectoral plans, socio-economic development programs for territories, districts, and municipalities, and spatial planning.

To achieve this, it is necessary to ensure the integrity of planning – integrating planning levels into a unified hierarchical system based on data and ensuring a balance between national interests and the interests of local communities.

* Principles and methods

- Focus on territorial/regional specialization and regional/national economic integration;
- Broad participation of stakeholders in development, implementation, and monitoring;
- Taking into account environmental and climate change factors;
- Combination of socio-economic and spatial planning;
- Standard sets of development indicators;
- Planning based on systematic data sets and the use of information systems for effective planning and forecasting;
- Assessment of all available resources;
- Automated processes and formats.

Comprehensive planning for the socio-economic development of regions

Purpose of the Methodology

- **Providing local state administrations with methodological recommendations for the effective and unified preparation of district socio-economic development programs.**

Tasks of the Methodology

- **To establish a comprehensive overall system for planning the socio-economic development of the region through Socio-Economic Development Programs (SEDPs);**
- **To make the SEDP development process accessible;**
- **To improve the process of monitoring the implementation of SEDPs.**

Feature of the Methodology: Introduction of the new "Comprehensive Planning" approach.

**"Electronic Passport of
Local Self-Government
Bodies"**

**"Electronic Household
Record Book"**

**"Social Passport of a
Low-Income Family"**

**"Procedure for the allocation
of municipally owned land
plots for individual housing
construction and for lease"**

**"Unified Register of
Municipal Property"**

It is planned to integrate the "Comprehensive Planning" approach into the "Sanarip Aimak" automated information system.

Advantages of the New Methodology

Availability of
standard templates
for the SEDP
document and its
annexes

Detailed algorithm for
developing the
SEDP.

Roles of participants
in development and
implementation.

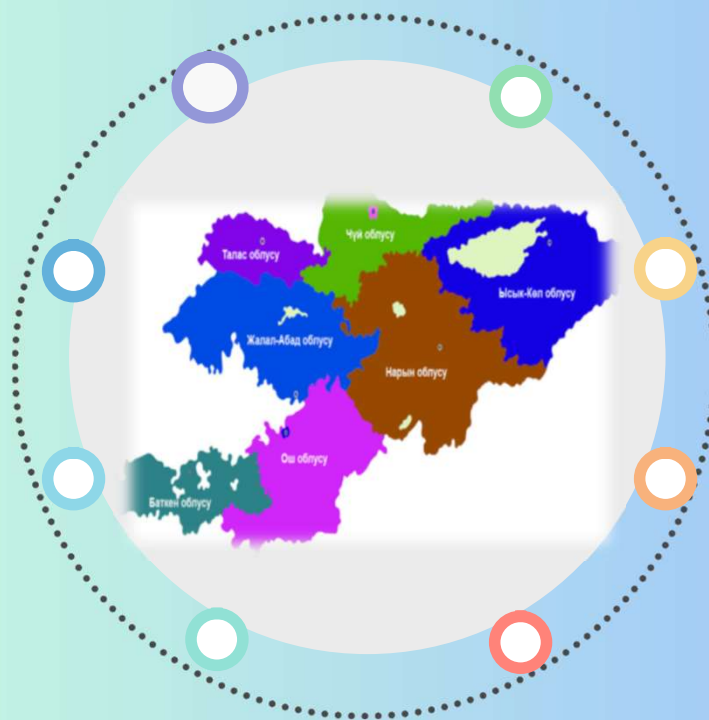

Socio-economic
planning model

A specific timeline for
developing and
monitoring the SEDP.

Detailed algorithm for the
SEDP development
process.

Results of the training on developing socio-economic development programs for Local Self-Government Bodies (LSGBs).

To ensure the development of socio-economic development programs for LSGBs in a unified format according to the approved methodology, training sessions were conducted jointly with the World Bank from April to December 2024 for employees of aiyl aimaks and local state administrations across all regions

As a result of the trainings, **2,052** employees of local self-government bodies (LSGBs), as well as **706** employees of local state administrations and district departments of state bodies, were trained. The training sessions were conducted by the Academy of Local Governance of Central Asia

SEDPs adopted based on the methodology.

District-level (LSA) Socio-Economic Development Programs (SEDPs) were adopted.

SEDPs were adopted at the level of Aiyi Aimaks (LSGBs).
