

Business Ready 2024 Data README

This compressed folder (.zip) currently contains two Excel workbooks presenting the following:

- 1- Economy scores by pillar and economy scores by topic at different levels (overall topic score and scores by pillar, category, sub-category, and indicator) for 50 economies. The workbook was last updated on April 11, 2025, to correct mistakes identified in data aggregation or scoring after Business Ready 2024's publication on October 3, 2024. The workbook contains a separate "CORRECTIONS" sheet, where details on changes by category are reported.
- 2- Economy-level answers and granular expert-level responses to each question by topic for all 50 economies. This information is also available on each economy's data page on the Business Ready website.

Both workbooks have a more detailed README sheet in the file, explaining its organization, data, and details on special values.
